BLUE RIDGE LANDFILL - FRESNO

3/14/2016 to 5/31/2016 Inv. # - 1320039

Page 2 of 5

INTRODUCTION

On March 3, 7, 11, 15 and 16, 2016, the Texas Commission on Environmental Quality (TCEQ) Houston Region Office received 5 (five) complaints alleging odors from Blue Ridge Landfill (BRL) located at 2200 FM 521, Fresno (Fort Bend County), Texas 77545. The odors were alleged to have occurred on March 3, 4, 10, 12 and 14, 2016.

On March 4, 2016, Mr. Richard Blackney and Mr. Chris Crook, Environmental Investigators of the TCEQ Houston Region Office, conducted an odor survey in the area near BRL. See Investigation No. 1315382 for the results of that investigation. On March 14, 2016, Mr. Blackney conducted an odor survey in the area near BRL and an unannounced Odor Complaint Investigation at BRL.

BACKGROUND

The most recent Waste Section Odor Complaint Investigations (Nos. 1300533, 1308059, and 1314675) at BRL were conducted on December 18, 2015, February 2, 2016, and March 2, 2016. One alleged violation for erosion of cover was noted on December 18, 2015 and remains outstanding.

GENERAL FACILITY AND PROCESS INFORMATION

BRL authorization numbers from the TCEQ Central Registry database are included in Attachment 1. BRL is a Type I landfill which is authorized to operate by TCEQ Municipal Solid Waste (MSW) Permit No. 1505A.

The landfill is authorized to accept municipal solid waste including household solid waste, commercial solid waste, construction and demolition waste, and yard waste; Class 1, Class 2 and Class 3 non-hazardous industrial waste; and certain special wastes. Class 1 waste is buried in the designated Class 1 cell of the landfill. The special waste currently accepted includes: dead animals, sludge and Class 2 industrial waste.

The waste acceptance hours are Monday through Friday, 4:00 am to 5:00 pm, and Saturdays from 5:30 am to 12:00 pm. The surrounding land use includes industrial facilities and residential subdivisions.

Complainant Information:

See confidential files (TCEQ Incident Nos. 228759, 228788, 229047, 229216 and 229219).

Description of Alleged Effects:

A complainant alleged nasal irritation and breathing problems.

Meteorological data at the time of the March 14, 2016 odor survey:

Wind direction: SSW

Wind Speed: 7.6 mph

Temperature: 74.5°F

Meteorological data taken from TCEQ's continuous air monitoring stations (Attachment 2).

Odor Complaint Investigation:

The investigator went to Odor Survey (OS) No. 1 located at the 16600 block of Sidonie Drive. OS No. 1 took place downwind of BRL and was conducted at 9:48 a.m. No odors were detected during the 15 minutes spent at OS No. 1.

The investigator then went to OS No. 2 located at the 16600 block of Ripple Ridge. OS No. 2 took place crosswind of BRL and was conducted at 10:04 a.m. No odors were detected during the 15 minutes spent at OS No. 2.

The investigator then went to OS No. 3 located at the 4600 block of Ripple Ridge. OS No. 3 took place crosswind of BRL and was conducted at 10:23 a.m. No odors were detected during the 15 minutes spent at OS No. 3.

An aerial view map of the OS locations and the OS logs are included in Attachment 2.

Summary of March 14, 2016 on-site investigation:

Following the odor survey, the investigator arrived at BRL at approximately 11:00 a.m., and met with Mr. Larry

BLUE RIDGE LANDFILL - FRESNO

3/14/2016 to 5/31/2016 Inv. # - 1320039

Page 3 of 5

Munger, Operations Supervisor, to whom the purpose and scope of the investigation were explained. BRL has a system of misters for the purpose of neutralizing odors. According to BRL representatives, BRL has extended the mister system by hundreds of feet on the eastern portion of the landfill, as well as to the east of the Class 1 cell. The investigator viewed the new extensions of the misting system in operation.

BRL receives Class 1 waste in its Class 1 disposal cell Monday through Friday, and receives MSW in the MSW cell Monday through Saturday. Six inches of soil is applied to the Class 1 cell and MSW cell at the end of each operating day. Mr. Munger drove the investigator to the MSW and Class 1 working faces, by which piles of soil were observed. The investigator obtained copies of the cover logs for March 2016 (Attachment 3). The cover logs indicated that soil had been applied to the working faces as required. No issues were noted.

Description of Odor:

Odors typical of landfill garbage were not detected during the odor surveys around Blue Ridge Landfill.

Description of the Effects on the Investigator:

No health effects were experienced by the investigator.

Description of the Terrain Features of the Area:

Terrain is flat with residences and businesses.

Location of the Source of the Odor:

The alleged source of the odor is BRL.

ODOR FIDO CHART EVALUATION:

According to the Frequency Intensity Duration Offensiveness (FIDO) protocol, the odor of landfill garbage is characterized as "offensive". As odors were previously detected on the investigations conducted on December 18, 2015 and February 2, 2016, the frequency of documented odors is quarterly.

Physical Effects Experienced by the Investigator which are Indicative of Adverse Effects upon Health:

The investigator did not experience any physical effects during the investigation.

Normal use of Property Affected by the Odor and the Manner in which such Odor could Reasonably be Expected to Interfere with this Use:

According to FIDO protocol, a nuisance condition was not confirmed.

SUMMARY OF INVESTIGATION FINDINGS

OUTSTANDING ALLEGED VIOLATION

The following alleged violation was noted during the investigation conducted on December 18, 2015 and remains outstanding:

Site Operating Plan 4.18 / 30 Texas Administrative Code §330.165(g) – Landfill Cover (Category C4)

Erosion gullies that are four or more inches deep on final or intermediate cover must be repaired within five days of detection by restoring the cover material, grading, compacting, and seeding unless the commission's regional office approves otherwise, based on the extent of the damage requiring more time to repair or the repairs are delayed because of weather conditions. The date of detection of erosion and date of completion of repairs, including reasons for any delays, must be documented in the cover inspection record.

Erosion of cover was observed at Blue Ridge Landfill on December 18, 2015, and the date of detection was not in the cover log, nor a reason for delay of repair of cover.

On January 5, 2016, the facility representative sent photographs to the TCEQ showing repair of cover. On February 2, 2016, the area was observed by the investigator to have been largely repaired, but it appeared there remained some gullies where cover was eroded by more than four inches. On March 2, 2016, the area appeared to have been repaired, and the cover log from February 2016 was viewed which indicated that repair of cover was completed on February 13, 2016. However, during an on-site investigation conducted on March 2, 2016, another area of erosion of cover was observed.

Blue Ridge Landfill is requested to restore the cover material and include the date of completion of repairs in the cover log. The facility is requested to submit documentation to the TCEQ Houston Region Office to verify compliance.

OUTSTANDING ALLEGED VIOLATION(S)

Track Number: 598524

Compliance Due Date: To Be Determined

Violation Start Date: Unknown

30 TAC Chapter 330.165(g)

PERMIT 1505A, Site Operating Plan 4.18.3

Erosion gullies or washed-out areas will be repaired within 5 days of detection by restoring the cover material, grading, compacting, and seeding.

Alleged Violation:

Investigation: 1300533

Comment Date: 03/18/2016

Erosion gullies that are four or more inches deep on final or intermediate cover must be repaired within five days of detection by restoring the cover material, grading, compacting, and seeding unless the commission's regional office approves otherwise, based on the extent of the damage requiring more time to repair or the repairs are delayed because of weather conditions. The date of detection of erosion and date of completion of repairs, including reasons for any delays, must be documented in the cover inspection record.

Erosion of cover was observed at Blue Ridge Landfill on December 18, 2015, and the date of detection was not in the cover log, nor a reason for delay of repair of cover.

Investigation: 1308059

Comment Date: 04/05/2016

Erosion gullies that are four or more inches deep on final or intermediate cover must be repaired within five days of detection by restoring the cover material, grading, compacting, and seeding unless the commission's regional office approves otherwise, based on the extent of the damage requiring more time to repair or the repairs are delayed because of weather conditions. The date of detection of erosion and date of completion of repairs, including reasons for any delays, must be documented in the cover inspection record.

Erosion of cover was observed at Blue Ridge Landfill on December 18, 2015, and the date of detection was not in the cover log, nor a reason for delay of repair of cover.

Investigation: 1314675

Comment Date: 04/22/2016

Compliance with this regulation was evaluated during investigations on February 2, 2016 and March 2, 2016.

Investigation: 1320039

Comment Date: 05/16/2016

Compliance with this regulation was evaluated during the investigation on March 14, 2016.

Recommended Corrective Action: On January 5, 2016, the facility representative sent photographs to the TCEQ showing repair of cover. On February 2, 2016, the area was observed by the investigator to have been largely repaired, but it appeared there remained some gullies where cover was eroded by more than four inches. On March 2, 2016, the area appeared to have been repaired, and the cover log from February 2016 was viewed which indicated that repair of cover was completed on February 13, 2016. However, on March 2, 2016, another area of erosion of cover was observed. Blue Ridge Landfill is requested to restore the cover material and include the date of completion of repairs in the cover log. The facility is requested to submit documentation to the TCEQ Houston Region Office to verify compliance.

Houston, Texas 77078

Re: Additional Compliance Documentation Needed for:
Blue Ridge Landfill, 2200 FM 521 Rd., Fresno (Fort Bend County), Texas 77545
TCEQ Municipal Solid Waste Permit No. 1505A

Dear Mr. Stengl:

On March 14, 2016, Mr. Richard Blackney of the Texas Commission on Environmental Quality (TCEQ) Houston Region Office conducted an investigation of the above-referenced regulated entity to evaluate compliance with applicable requirements for municipal solid waste. Enclosed is a summary which lists the investigation findings. During a previous investigation on December 18, 2015, a concern was noted which was an alleged violation.

We have received the compliance documentation that you submitted January 5, 2016. However, information is still needed for the alleged violation listed in the enclosed summary. Please submit to our office within 30 days of receipt of this letter a written description of corrective action taken and the required compliance documentation demonstrating that this issue has been resolved.

The TCEQ appreciates your assistance in this matter and your compliance efforts to protect the State's environment. We look forward to receiving your response for the remaining alleged violation. Please note that the Legislature has granted TCEQ enforcement powers which we may exercise to ensure compliance with environmental regulatory requirements.

If you or members of your staff have any questions, please feel free to contact Mr. Blackney in the Houston Region Office at (713) 767-3718.

Sincerely,

A handwritten signature in cursive script that reads "Alma L. Jefferson".

Alma L. Jefferson, Team Leader
Waste Section
Houston Region Office

x.xx Indicates the data has been validated.																									
Maximum values for each parameter are bold within the table. Minimum values are bold italic .																									
R - Data from this instrument meets EPA quality assurance criteria for regulatory purposes.																									

Previous Day

March 13, 2016

Daily maxima and minima for CAMS 84.

All times shown are CST.

Parameter	POC	Daily Maximum		Daily Minimum	
		Value	Hour	Value	Hour
Nitric Oxide	1	-0.3	10:00 pm	-1.1	3:00 pm
Nitrogen Dioxide	1 R	0.9	5:00 am	-2.7	10:00 am
Oxides of Nitrogen	1	0.5	5:00 am	-3.3	9:00 am
Ozone	1 R	49	11:00 am	23	4:00 am
Wind Speed	1	14.7	11:00 am	3.2	Midnite
Resultant Wind Speed	1	14.1	11:00 am	3.1	Midnite
Resultant Wind Direction	1	222	3:00 pm	143	4:00 am
Maximum Wind Gust	1	27.8	1:00 pm	5.0	2:00 am
Std. Dev. Wind Direction	1	24	3:00 pm	7	2:00 am
Outdoor Temperature	1	80.5	3:00 pm	58.4	2:00 am
Internal Station Temperature	1	81.6	Noon	79.1	6:00 am
R - Data from this instrument meets EPA quality assurance criteria for regulatory purposes.					

PLEASE NOTE: This data has not been verified by the TCEQ and may change. This is the most current data, but it is not official until it has been certified by our technical staff. Data is collected from TCEQ ambient monitoring sites and may include data collected by other outside agencies. This data is updated hourly. All
