TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

November 30, 2015

Mr. Burgess Stengl
Environmental Manager
Blue Ridge Landfill TX LP
5757A Oates Road
Houston, Texas 77078

Re: Investigation Request at:
Blue Ridge Landfill, 2200 FM 521 Rd, Fresno, TX 77545-8214
TCEQ MSW Permit No.: 1505A
Investigation No.: 1282994
Incident No(s): 219502

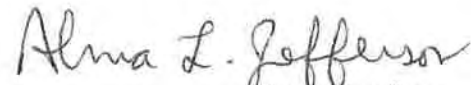

Dear Mr. Stengl:

The Texas Commission on Environmental Quality (TCEQ) Houston Region Office received on August 26, 2015 a request for assistance regarding the offensive odor at the above-referenced facility. In response to this request, Ms. Ursula Guzman of this office conducted an investigation on September 10, 2015. No violations are being alleged as a result of the investigation.

For more information about our complaint process, you may access the publication GI-278: *Do You Want to Make an Environmental Complaint? Do You Have Information or Evidence?* on our website at www.tceq.texas.gov.

We appreciate your assistance in this matter and your interest in protecting the quality of our environment. If you have any questions concerning these findings, or if we can be of further assistance, please contact Ms. Guzman at this office at (713) 422-8964.

Sincerely,

Alma L. Jefferson, Team Leader
Waste Section
Houston Region Office

Investigation Comments:

INTRODUCTION

On August 26, 2015, an odor complaint was received by the Texas Commission on Environmental Quality (TCEQ) Houston Region Office (TCEQ Consolidated Compliance and Enforcement Data System (CCEDS) Incident No. 219502). The complainant alleged that on August 20-25, 2015, there was an offensive odor that made the complainant's eyes water emitting from Blue Ridge Landfill (BRL), located at 2200 FM 521, Fresno (Fort Bend County), Texas 77545. An aerial view map of the facility with Odor Survey (OS) locations is provided in Attachment 1.

On September 10, 2015, Ms. Ursula Guzman and Mr. Richard Blackney, Environmental Investigators for the TCEQ Houston Region Office, conducted an unannounced odor complaint investigation in the area surrounding BRL, and on site at BRL to determine if, in relation to the complaint, there were violations of operational rules or standards.

BACKGROUND

The Houston Region Office files were reviewed and a CCEDS search was conducted pursuant to this investigation. The most recent odor complaints were previously investigated at BRL on June 10, 2015 (Investigation No. 1259322), and July 7, 2015 (Investigation No. 1261849). No odor nuisance violations were noted as a result.

GENERAL FACILITY AND PROCESS INFORMATION

BRL is a Type I landfill which is authorized to operate by TCEQ Municipal Solid Waste Permit No. 1505A. The facility is identified in the TCEQ Central Registry by the Regulated Entity No. RN102610102 and Customer No. CN602820599 (Attachment 2). The landfill received its permit in March 1985 and began operating on January 31, 1986. In January 2006, the landfill submitted a major permit amendment to: (i) increase the permit boundary from 598.6 acres to 1,344.88 acres; (ii) increase the fill area from 301.89 acres to 784.24 acres; (iii) and increase the maximum height from the current 58 feet to 170 feet. The permit amendment authorization was approved on July 2, 2010.

The landfill is authorized to accept municipal solid waste including: household solid waste, commercial solid waste, construction and demolition waste, and yard waste; Class 1, Class 2 and Class 3 non-hazardous industrial waste; and certain special wastes. Class 1 waste is buried in the designated Class 1 cell of the landfill. The special waste currently accepted includes: dead animals, sludge and Class 2 industrial waste.

The current waste acceptance hours are Monday through Friday from 4:00 AM to 5:00 PM and Saturday from 5:30 AM to 12:00 PM. The surrounding land use includes light industry, agricultural production, and several residential subdivisions.

Complainant Information:

See confidential file (Incident No. 219502). The meteorological conditions during the time of the alleged complaint are included in Attachment 3.

Description of Alleged Effects:

The complaint alleged that the odor made the complainant's eyes water.

INVESTIGATION

The investigators surveyed the first survey point at the 2700 block of Autumn Falls Drive, Pearland, Texas 77584 at 12:13 PM. No odors were detected during the 15 minutes spent at OS 1.

The investigators surveyed the second survey point at the 5900 block of Santa Christi Drive, Houston, Texas 77053 at 12:39 PM. No odors were detected during the 15 minutes spent at OS 2.

The investigators surveyed the third survey point at the 2500 block of Nail Road, Fresno, Texas 77545 at 1:05 PM. No odors were detected during the 15 minutes spent at OS 3. The OS logs are found in Attachment 4.

The wind direction during the time of the three odor surveys varied between south-southeast (SSE), west-southwest (WSW) and west (W), making OS one (1) and OS two (2) downwind of BRL at different times. OS three (3) was crosswind and downwind of BRL at the time of the investigation.

The investigators arrived at BRL at approximately 1:30 PM and met with Mr. Matt Montagna, Operations Manager for BRL. The purpose and scope of the investigation were explained to Mr. Montagna. Mr. Montagna then drove the investigators to the municipal solid waste (MSW) cell working face which manages putrescible household waste, special waste, Class 2, and Class 3 industrial waste; the Class 1 working face; and the solidification basin. Fly ash and wood chips were observed to be available for use as a solidifying agent in the solidification basin. No issues were noted regarding the solidification basin, MSW cell, or Class 1 cell. The investigators also observed that a landfill deodorizer system was in use at the time of the investigation.

BRL uses six inches of soil for daily cover Monday through Friday on the Class 1 non-hazardous cell and six inches of soil for daily cover Monday through Saturday on the MSW working face. Mr. Montagna then provided the investigators with the cover logs for the MSW cell and the Class 1 non-hazardous waste cell for the month of August 2015 (Attachment 5). The daily cover logs were reviewed and appeared to be adequate.

Meteorological data at the time of the investigation

Cloud cover: Scattered Clouds
Wind direction: SSE, WSW, W
Wind speed: 3.5 – 10.4 miles per hour
Temperature: 80 – 87 degrees Fahrenheit
Precipitation: 0.00 - 0.01 inch

The information above was received from the Weather Underground (Attachment 6).

Description of odor:
No odors were detected during the investigation.

Description of the effects on the Investigator:
No health effects were experienced by investigators

Description of the terrain features of the area:
Terrain is flat with houses and streets.

Location of the source of the odor:
The alleged source of the odor is BRL.

ODOR FIDO CHART EVALUATION:

The intensity and offensiveness of any odors observed during the investigation using the terms identified for those factors on the Frequency Intensity Duration Offensiveness (FIDO) chart were noted as follows:

Per the FIDO odor characterization examples, landfill garbage/waste odor is characterized as “offensive”. The frequency category has been determined to be a “single occurrence”.

Physical effects experienced by the investigator which are indicative of adverse effects upon health:

The investigators did not experience any physical effects during the investigation.

Normal use of property affected by the odor and the manner in which such odor could reasonably be expected to interfere with this use:

According to FIDO protocol, a nuisance condition was not confirmed.

CONCLUSION

The complaint is unconfirmed for nuisance odors.

No Violations Associated to this Investigation

AMT = Amount of cover (soil) in yd³ or alternate daily cover in bags or tarp area
 T = Thickness in inches
 Methods: A = Tarp Machine, B = Soil by Heavy Equipment, S = Spray-On
 Inspect areas with daily cover or alternate daily cover each day the site is in operation and areas with intermediate and final cover weekly or within 72 hours of a rainfall event of 0.5" or more. Inspect all areas in accordance with Site Operating Plan Section 4.18. Additional documentation area on back of form.
 Erosion of daily cover must be corrected within 24 hours after the area is accessible. Erosion of intermediate or final cover must be corrected within 5 days of detection unless approved by TCEQ Regional Office. If not corrected within 5 days, attach documentation stating reasons for delay.
 Corrective Action: R = Restoring cover material; G = Grading; M = Compacting; S = Steeding
 SOP Section 7.74 requires a soil stockpile to be maintained within 1,000 ft of the working face. The amount of soil required is dependent upon the maximum anticipated size of the working face. A 50 yd³ soil stockpile is required within 100ft of the Regulated Asbestos-Containing Material (RACM) disposal area.
 Signature certifies work accomplished as stated in the Cover Application Log

AMT = Amount of cover (soil) in yd³ or alternate daily cover in bags or tarp area
 T = Thickness in inches
 Methods: A = Tarp Machine, B = Soil by Heavy Equipment, S = Spray-On
 Inspect areas with daily cover or alternate daily cover each day the site is in operation and areas with intermediate and final cover weekly or within 72 hours of a rainfall event of 0.5" or more. Inspect all areas in accordance with Site Operating Plan Section 4.18. Additional documentation area on back of form.
 Erosion of daily cover must be corrected within 24 hours after the area is accessible. Erosion of intermediate or final cover must be corrected within 5 days, attach documentation stating reasons for delay.
 Corrective Action: R = Restoring cover material; G = Grading; M = Compacting; S = Seeding
 SOP Section 7.74 requires a soil stockpile to be maintained within 1,000 ft of the working face. The amount of soil required is dependent upon the maximum anticipated size of the working face. A 50 yd³ soil stockpile is required within 100ft of the Regulated Asbestos-Containing Material (RACM) disposal area.
 Signature certifies work accomplished as stated in the Cover Application Log.
