

Blue Ridge Landfill Team: Landfill Upgrades Have Potential to Cause Temporary Off-Site Odor

PEARLAND, TX (July 29, 2016) -- As a responsible landfill manager, the Blue Ridge Landfill team must periodically upgrade our landfill gas collection system. We will be installing new landfill gas collection wells on site over the next four weeks, and there is potential for off-site detection of odor. The Landfill team will make every attempt to minimize odor during this work, and we extend our sincere appreciation to the community for its understanding as the team makes these upgrades. Please reach out to the Landfill if you have any questions about this project.
