

**Odor Task Force
August 17, 2016
11200 Broadway, Suite 1390**

Agenda

- I. Call to Order**
- II. Introductions**
- III. Discussion and possible action regarding the minutes from the August 3, 2016 meeting**
- IV. Discussion and possible action regarding updates**
 - A. Modeling Report from Mr. Lucian Hill regarding May 4th and 5th odor event**
- V. Open Discussion**
- VI. Next Meeting Date**
- VII. Adjourn**

Minutes Odor Task Force
August 3, 2016

The Odor Task Force held a regular meeting at 6:00 PM, in the Pearland Convention and Visitors Bureau Conference Room located at 11200 Broadway, Suite 1390 in Pearland, Texas.

1. Call to Order: The meeting was called to order at 6:05 PM
2. Roll Call: The following members were in attendance at the meeting:

Sparkle Anderson
Jon R. Branson
Trent Epperson
Lucian Hill
Joe Dowdy on behalf of Kevin McLeod
Ed Mears
Brandon Rodgers
Laurie Rodriguez (via telephone)
Maria Shaw

3. Discussion and possible action regarding the minutes from the May 25th and July 13th Odor Task Force Meetings:

A motion was made by Mr. Lucian Hill to approve the minutes. The motion was seconded by Mr. Ed Mears and the minutes were approved unanimously.

4. Discussion and possible action regarding updates:
 - A. West Pearland Air Quality Webpage - The previous agendas and their respective minutes have been posted to the Opt-In-Page. Metrics for the website will be available for review at the next meeting.
 - B. TCEQ Testing - No Report
 - C. Blue Ridge Landfill Update – Blue Ridge is in the process of installing 40 new Gas detection devices on site using best practices to ensure minimal gas “leakage” from the drill holes. The project is 50% complete at this time and should be finished within the next week.

5. Open discussion:

There was considerable discussion regarding the heavy rain events and the presence of a strong odor seemingly coming from the landfill a few days after each heavy rain event. It was discussed that a detailed, low level surface scan directly on the landfill cap was necessary to test for VOC's and methane's. Devices that measure as small as 500 parts per million are necessary to rule out potential voids or weaknesses in the cap. It was recommended to sample 1 acre grids in increments of 1, 2, 6 and 12hr intervals for a two week time period to develop a base line and/or a "Scientific Appropriate Measure" sample. This should be done in 3 or 4 areas across the entire site. Air, Water and soil be tested as well to further pinpoint the source.

Mr. Lucian Hill offered to do some additional modeling of a past odor event that took place on May 4th and 5th of this year. The group will review the report at the next regular meeting.

6. Next Meeting:

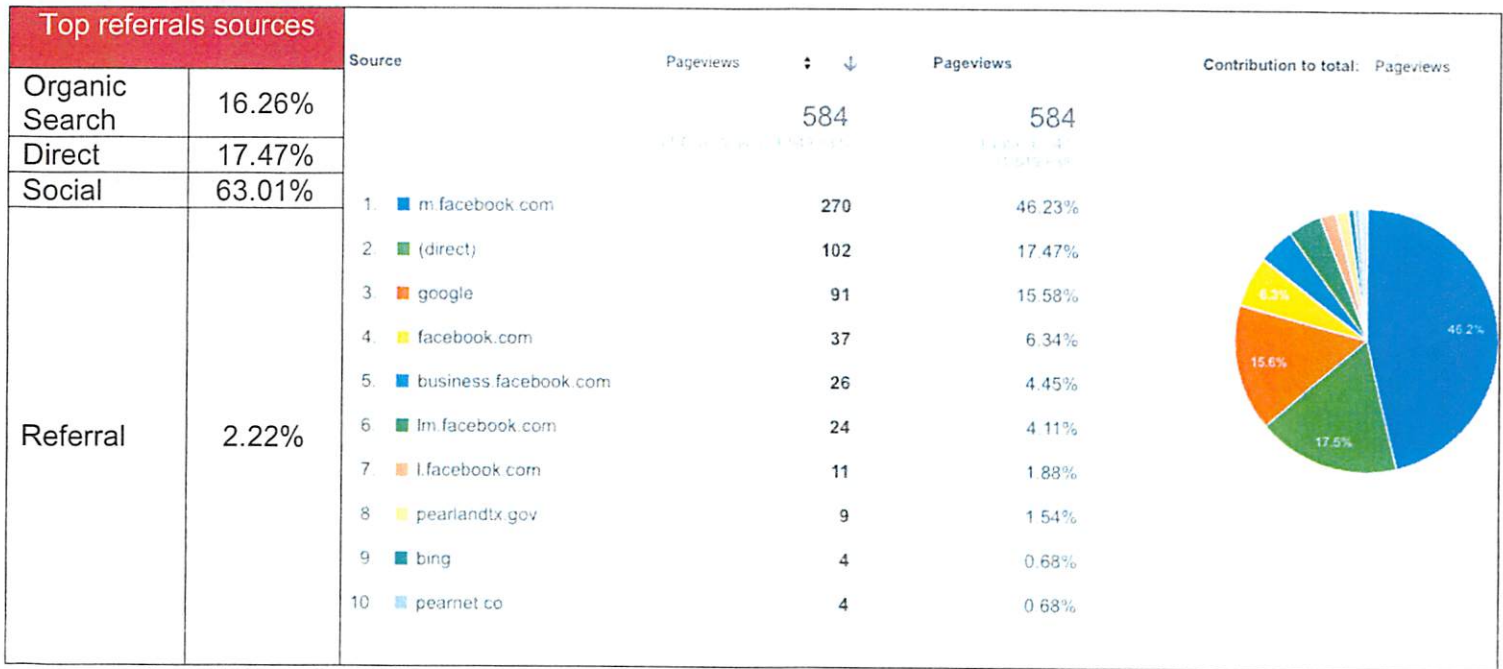

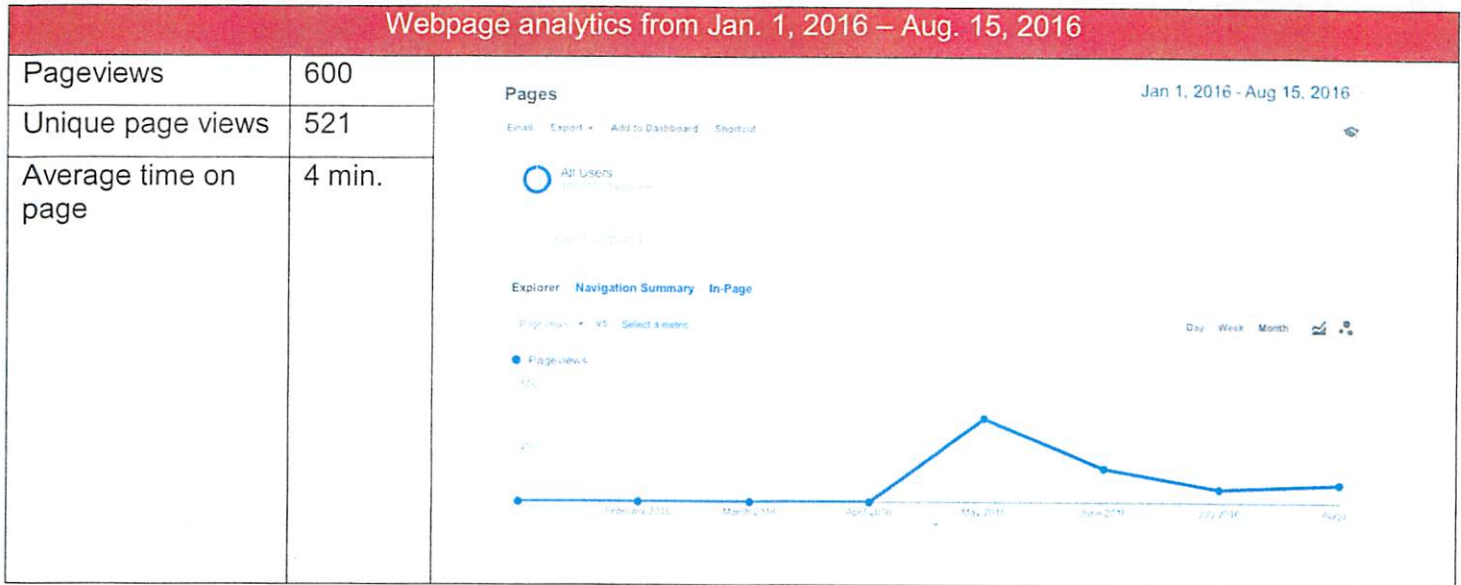

The next regular meeting is tentatively scheduled to take place at the Pearland Convention and Visitors Bureau Conference Room on August 17, 2016

7. Adjourn: The meeting was adjourned at 7:17 PM.
