

## Pearland, TX

Dashboard Summary of Findings

2017

2955 Valmont Road Suite 300 Boulder, Colorado 80301 n-r-c.com • 303-444-7863

777 North Capitol Street NE Suite 500 Washington, DC 20002 icma.org • 800-745-8780

## **Summary**

The National Citizen Survey™ (The NCS™) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report summarizes Pearland's performance in the eight facets of community livability with the "General" rating as a summary of results from the overarching questions not shown within any of the eight facets. The "Overall" represents the community pillar in its entirety (the eight facets and general).

By summarizing resident ratings across the eight facets and three pillars of a livable community, a picture of Pearland's community livability emerges. Below, the color of each community facet summarizes how residents rated each of the pillars that support it – Community Characteristics, Governance and Participation. When most ratings were higher than the benchmark, the color is the darkest shade; when most ratings were lower than the benchmark, the color is the lightest shade. A mix of ratings (higher and lower than the benchmark) results in a color between the extremes.

Pearland residents' ratings across all three pillars of community livability tended to be similar to ratings seen in other communities across the country. Within Community Characteristics, aspects of Mobility tended to receive ratings that were lower than the national benchmark comparisons, but ratings for Built Environment tended to be higher than those seen in comparison communities. Ratings for Economy within the pillar of Governance were also exceptionally high. This information can be helpful in identifying the areas that merit more attention.
