TEXAS COMMISSION ON ENVIRONMENTAL QUALITY

Protecting Texas by Reducing and Preventing Pollution

September 26, 2019

Mr. Tim Telepak, Environmental Manager
Blue Ridge Landfill TX, LP
P.O. Box 879
Fresno, Texas 77545

Re: Investigation Request at:
Blue Ridge Landfill, 2200 FM 521 Rd., Fresno (Fort Bend County), Texas
TCEQ MSW Permit No.: 1505A
Investigation No.: 1590671

Dear Mr. Telepak:

The Texas Commission on Environmental Quality (TCEQ) Houston Region Office received on August 4, 12, 14, 15, 16, and 20, 2019, requests for assistance regarding the odor at the above-referenced facility. In response to this request, Ms. Naomi Hall, Ms. Nicole Weist and Mr. Edward Lichtenberger of this office conducted an investigation on August 16, 2019. No violations are being alleged as a result of the investigation.

For more information about our complaint process, you may access the publication GI-278: *Do You Want to Make an Environmental Complaint? Do You Have Information or Evidence?* on our website at www.tceq.texas.gov.

We appreciate your assistance in this matter and your interest in protecting the quality of our environment. If you have any questions concerning these findings, or if we can be of further assistance, please contact Ms. Naomi Hall at this office (713) 767-3702.

Sincerely,

Carlos R. Romo, Team Leader
Waste Section
Houston Region Office

Investigation Comments:

INTRODUCTION
On August 4, 12, 14, 15, 16, and 20, 2019, the Texas Commission on Environmental Quality (TCEQ) Houston Region Office Waste Section received 18 complaints alleging odors from Blue Ridge Landfill (BRL) located at 2200 FM 521 Road, Fresno (Fort Bend County), Texas 77545. The odors were alleged to have occurred on August 4, 12, 13, 14, 15, and 16 2019.

On August 16, 2019, Ms. Nicole Weist, Mr. Edward Lichtenberger and Ms. Naomi Hall, Environmental Investigators of the TCEQ Houston Region Office Waste Section, conducted an odor survey of the area surrounding the landfill, and an unannounced on-site Odor Complaint Investigation at Blue Ridge Landfill.

BACKGROUND
A Notice of Enforcement was issued to BRL on October 21, 2016 for failure to prevent nuisance odor conditions. On July 12, 2017, Agreed Order Docket No. 2016-1923-AIR-E was signed by the TCEQ. By letter dated April 10, 2018, the TCEQ Enforcement Division approved BRL Odor Control Plan, thus requiring BRL to implement all provisions of the plan in accordance with the approved schedule.

GENERAL FACILITY AND PROCESS INFORMATION
BRL is a Type I landfill which is authorized to operate by TCEQ Municipal Solid Waste (MSW) Permit No. 1505A.

The landfill is authorized to dispose of MSW including household solid waste, commercial solid waste, construction and demolition waste, and yard waste; Class 1, Class 2, and Class 3 non-hazardous industrial solid waste; and certain special wastes. Liquid waste will be accepted at the Liquid Waste Bulking Facility for stabilization and subsequent disposal. BRL may not accept regulated hazardous waste, prohibited polychlorinated biphenyls, or untreated medical waste.

The waste acceptance hours are Monday through Friday, 4:00 a.m. to 5:00 p.m., and Saturdays from 5:30 a.m. to 12:00 p.m. The surrounding land use includes industrial facilities and residential subdivisions.

Complainant Information:
TCEQ Incident Nos. 318306, 319003, 319004, 319005, 319006, 319007, 319008, 319010, 319011, 319012, 319013, 319014, 319020, 319021, 319022, 319024, 319025, and 319272.

Description of Alleged Effects:
Breathing difficulty, nausea, and gagging symptoms were described as occurring because of the odors.

Meteorological data at the time of the odor survey:

Date: August 16, 2019

Wind Direction: west/ northwest

Wind Speed: average 5.5 mph

Outdoor Temperature: 87.6 °F

Meteorological data taken from TCEQ's continuous air monitoring station Manvel Croix Park C84 weather station (Attachment 1).

Odor Survey (OS):
Mr. Lichtenberger conducted OS No. 1 at 7:00 a.m., upwind of BRL at 7003 McHard Road in Houston. No odors were detected during 60 minutes spent at OS No. 1.

Ms. Weist conducted OS No. 2 at 7:30 a.m., at 1900 Cayman Bend in Pearland. No odors were detected during the 60 minutes spent at OS No. 2.

Mr. Lichtenberger conducted OS No. 3 at 8:09 a.m., downwind of BRL at 2400 Lost Bridge Lane in Pearland. Meteorological data indicated a northwest wind direction. No odors were detected during the 60 minutes spent at OS No. 3.

Ms. Weist conducted OS No. 4 at 8:50 a.m., at the intersection of Trinity Bay Drive and Biscayne Bay Drive in Pearland. No odors were detected during the 60 minutes spent at OS No. 4.

Ms. Hall and Mr. Lichtenberger conducted OS No. 5 at 9:18 a.m. downwind of BRL at 3112 Vintage View Lane in Pearland. No odors were detected during the 60 minutes spent at OS No. 5.

An aerial view map of the OS location and the OS log are included in Attachment 1.

Summary of the on-site investigation:
On August 16, 2019, Ms. Hall, Ms. Weist and Mr. Lichtenberger arrived at BRL and met with Ms. Amy Kubinski, Environmental Specialist, Mr. Clint Dickerson, Division Manager, Mr. Zachary Pedersen, Operations Manager, and Mr. Robert Cox, General Manager, to whom the purpose and scope of the investigation were explained.

During the investigation, the BRL facility representatives drove the investigators to the MSW working face and the Class 1 working face. The investigators observed normal landfill operations in progress. A daily cover of soil is required to limit the amount of refuse exposed to the ambient air. Piles of soil were observed at each working face. No ponded water was found at the working face. The investigators obtained a copy of the MSW and Class 1 cover logs for the time period of July 1 to 31, 2019, and August 1 through 15, 2019 (Attachment 2). The cover logs indicate that six (6) inches of soil was applied at the end of each operating day to the Class 1 working face and the MSW working face as required. The investigators observed the solidification pit area and noted that the pits were covered, and no materials were being added, mixed or removed from the units at the time of the investigation. The odor control/odor neutralizing systems located at the MSW working face, the Class 1 working face and the solidification pit were observed in operation. The wind fences were in place and located downwind of the working face.

The facility is required to conduct offsite odor detection surveys twice during each business day and maintain a Survey Completion Log. A copy of the Twice Daily Offsite Odor Survey Log, dated from August 2 – 16, 2019 was

provided (Attachment 3). Each month the leachate components are required to be inspected by the facility to verify that they are sealed. BRL provided the Monthly Leachate Risers Survey Log for July 2019 (Attachment 3). The leachate risers and flares at the leachate risers were observed; no concerns were noted.

Description of Odor:
No odors were detected during the odor survey.

Description of the Effects on the Investigator:
No health effects were experienced by the investigators.

Description of the Terrain Features of the Area:
Terrain is flat with residences and businesses.

Location of the Source of the Odor:
No odors were detected off-site by the investigators.

Odor Frequency, Intensity, Duration and Offensiveness (FIDO) Chart Evaluation:
The TCEQ Odor Complaint Investigation Procedures FIDO Chart is a method used to provide consistent nuisance determinations and assist in description of odors. The character of an odor is a unique, innate quality of an odor that does not vary with intensity. The FIDO chart characterizes the odor of landfill garbage/waste as "offensive." Landfill garbage/waste odors from BRL were previously detected on July 23, 2019.

CONCLUSION
According to FIDO protocol, nuisance odor conditions were not confirmed during the investigation conducted on August 16, 2019.

No Violations Associated to this Investigation

Manvel Croix Park C84 Data by Site by Date (all parameters)

Use this form to retrieve hourly data collected at Manvel Croix Park C84. Although this is the most current data, it is not considered official until it has been certified by the technical staff. This information is updated hourly.

This web page provides the most current hourly averaged data available. Our convention for time-tagging data is the beginning of each hour. For example, values shown for the noon hour are based on measurements taken from noon to 1:00 p.m. The noon average will not be calculated until after 1:00 p.m. The noon average will then be available on our external server from 1:15 p.m. to 1:30 p.m. This results in an apparent one-hour time lag in the data. We also present our data in Local Standard Time for each measuring site. For most of Texas this is Central Standard Time. During Daylight Savings, this introduces another apparent one-hour time lag in the data.

Use the controls below to select a different date or time format. Click on the Generate Report button once you have made your selections.

Click on the Plot Data button once the tabular report has been generated to open a separate window containing data plots.

	[R] - Data from this instrument meets EPA quality assurance criteria for regulatory purposes.																			

PLEASE NOTE: This data has not been verified by the TCEQ and may change. This is the most current data, but it is not official until it has been certified by our technical staff. Data is collected from TCEQ ambient monitoring sites and

may include data collected by other outside agencies. This data is updated hourly. All times shown are in local standard time unless otherwise indicated.

Following EPA reporting guidelines, negative values may be displayed in our hourly criteria air quality data, down to the negative of the EPA listed Method Detection Limit (MDL) for the particular instrument that made the measurements. The reported concentrations can be negative due to zero drift in the electronic instrument output, data logger channel, or calibration adjustments to the data. Prior to 1/1/2013, slightly negative values were automatically set to zero.

AMT = Amount of cover (soil) in yd³ or alternate daily cover in bags or tarp area

T = Thickness in inches

Methods: A = Tarp Machine, B = Soil by Heavy Equipment, S = Spray-On

Inspect areas with daily cover or alternate daily cover each day the site is in operation and areas with intermediate and final cover weekly or within 72 hours of a rainfall event of 0.5" or more. Inspect all areas in accordance with Site Operating Plan Section 4.18. Additional documentation area on back of form.

Erosion of daily cover must be corrected within 24 hours after the area is accessible. Erosion of intermediate or final cover must be corrected within 5 days of detection unless approved by TCEQ Regional Office. If not corrected within 5 days, attach documentation starting reasons for delay.

Corrective Action: R = Restoring cover material; G = Grading, M = Compacting; S = Seeding

SOP Section 7.7.4 requires a soil stockpile to be maintained within 1,000 ft of the working face. The mount of soil required is dependent upon the maximum aticipated size of the working face. A 50 yd³ soil stockpile is required within 100ft of the Regulated Asbesto-Containing Material (RACM) disposal area.

Signature certifies work accomplished as stated in the Cover Application Log.

AMT = Amount of cover (soil) in yd^3 or alternate daily cover in bags or tarp area

T = Thickness in inches

Methods: A = Tarp Machine, B = Soil by Heavy Equipment, S = Spray-On

Inspect areas with daily cover or alternate daily cover each day the site is in operation and areas with intermediate and final cover weekly or within 72 hours of a rainfall event of 0.5" or more. Inspect all areas in accordance with Site Operating Plan Section 4.16. Additional documentation area on back of form.

Erosion of daily cover must be corrected within 24 hours after the area is accessible. Erosion of intermediate or final cover must be corrected within 5 days of detection unless approved by TCEQ Regional Office. If not corrected within 5 days, attach documentation starting reasons for delay.

Corrective Action: R = Restoring cover material; G = Grading, M = Compacting; S = Seeding

SOP Section 7.74 requires a soil stockpile to be maintained within 1,000 ft of the working face. The mount of soil required is dependent upon the maximum aticipated size of the working face. A 50 yd^3 soil stockpile is required within 100ft of the Regulated Asbesto-Containing Material (RACM) disposal area.

Signature certifies work accomplished as stated in the Cover Application Log
