OPEN HOUSE

Piper Road Drainage Improvements Project
Hillhouse Breakroom, 2559 Hillhouse, Pearland TX 77584
Tuesday, November 12, 2017, 6:00-7:00 p.m.

Dear Property Owner/Resident:

The City is continuing to move forward with plans for the **Piper Road Drainage Improvements Project**.

With the design of Piper Road Drainage Improvements underway the City is holding an informal Open House in order to provide local residents and property owners with updated information regarding the project. Drainage improvements will take place along Piper Road from FM 518 to Fite Road. This project will review the existing open ditch drainage system on Piper Road. The project will be to re-grade the ditches and reset culverts. This will allow for more of the drainage area to flow south to the linear detention pond just east of the middle school at Fite Road and FM 1128. The project will also include repaving of the asphalt roadway following the drainage improvements. This was an area identified in the Harvey Drainage Assessment Report as a local drainage improvement project. Open House exhibits will include proposed ditch alignments and cross sections. Design engineers, project management representatives, and City of Pearland staff will be available to discuss anticipated project schedules and answer questions about project improvements.

Sincerely,

Mahagony Isabell
